Utopian Road To Hell: Enslaving America And The World With Central Planning

Synopsis

Utopian dreamers are deceived and deceiving. Their "fight for the people" rhetoric may sound good at first, but history proves egalitarian governments and the cultures they try to create destroy freedom, destroy creativity, destroy human lives, create poverty and misery, and often spread beyond their borders to bring others under slavery. Utopians believe that through their own personal brilliance a better society can be created on earth. When the belief in man as a creation in the image of God is completely rejected, the use of slavery and mass execution can be justified in the name of the creation of a utopian state for the masses. Pol Pot, Vladimir Lenin, Adolf Hitler, Joseph Stalin, Mao Tse-tung together these so-called visionaries through their fanciful policies are responsible for the deaths of millions of people. In *Utopian Road to Hell* William J. Murray, son of atheist apologist Madelyn Murray O Hair, describes the totalitarians throughout history and the current utopians who are determined to engage in social engineering to control the lives of every person on earth. From Marx to Hitler, Murray explains the progression of socialist engineering from its occultist roots to the extreme madness of the Nazis nationalistic racism. From Margaret Sanger's Planned Parenthood and Saul Alinsky's *Rules for Radicals*, the rebellious desire to be free from morality drives the at-any-cost campaigns such as abortion on demand, no-fault divorce, same-sex marriage, and overreaching government provisions. From Woodrow Wilson's living document distortion of the Constitution and his income tax to FDR's New Deal to Obama's executive orders, those who seek centralized power typically do so by proclaiming some utopian scheme that they claim will perfect mankind and eliminate competition, greed, poverty, and war. William J. Murray masterfully educates us on the utopians' swath of destruction throughout history and warns us of the dangers of present-day utopians fighting to hold power. We must heed the warning of George Washington when he said in his 1796 Farewell Address that it is important for those entrusted with the administration of this great and free nation, to confine themselves within their respective constitutional spheres, avoiding in the exercise of the powers of one department to encroach upon another. We must reclaim the freedom of the individual to avoid the continued path down the utopian road to hell.

This book is a good condensed history of worldwide attempts to control the people using socialism, communism, or any other form of central planning. Needless to say, those endeavors have always ended in catastrophe. The only problem I had with the book was the author's insistence that virtually all evil in this world can be attributed to Atheism. The author should be reminded that there are many despots in Central America and South America who are devout Christians. The author, or anyone else sharing the same adoration of Christianity, might want to take the time to read "A World Lit Only By Fire" by William Manchester.

Bill Murray does a fine job in describing the wishful thinking of historical figures who have promised the moon, and in turn, utilized their new found powers in stamping out their enemies forever. The chapter on the true goat of the 20th Century, Stalin, is worth the price of admission to read the book alone.

A dark reality exists in our world, and that is the fact any time a human or government wishes to impose its view of what would make a perfect society, millions end up suffering and dying. Murray does an incredible job showcasing the regimes, tyrants, philosophies, and inevitable consequences that have decimated entire populations in the desire to create in their mind, a utopia. Furthermore, he awakens the reader to the very dangers within our own government and country and how we as citizens who have been blessed with Liberty must not stand idly by while elites look to take our freedoms away one regulation at a time. Worth the read. Recommending to anyone I can because of the truth inside the pages.

Everyone who believes in Freedom and Liberty needs to read this book. Whether you're a

Conservative or a Liberal, I challenge you to read this book with an open mind and see if your ideas of freedom and liberty are in agreement with those of the founding fathers.

This book should be required reading by State legislators for every high school and college student in America! It explains the indoctrination of all students and why they are supporting a utopian philosophy and really do not understand how they are being brainwashed to believe it is so good when history proves it is so bad. So evil as any atheistic life style will prove. "The fear of the Lord is the beginning of wisdom and knowledge." Without God wisdom is not given and Satan, the one whom Marx and others secretly worshipped, destroys the human soul and others who are brought under their totalitarian powers.

Excellent history and sense of where we are as a nation and what we need to do to return to common sense and our Constitutional liberties. This book states its case very clearly with lots of info.

Excellent in all aspects!

Easy to read and cogent argument for freedom. Author lays out the dangers of tyranny to include dependence on the state instead of the freedom of the individual.
